

# Petition to Ban Nuclear Weapons

WE THE UNDERSIGNED call upon the members of the Minnesota Congressional Delegation to support the 123 nations that voted to approve, by the end of 2017, a legally binding global treaty that would ban all nuclear weapons. Despite their inhumane, indiscriminate nature, and the imminent danger of nuclear weapons, they remain the only weapons of mass destruction not yet prohibited under international law.

Even the use of a fraction of current arsenals would result in catastrophic climate disruption, global famine, and could kill two billion people. As climate change progresses, the danger of nuclear war will increase dramatically as nations experience limited food and water resources while dealing with forced migrations that will dwarf the current refugee crisis. **We cannot wait for the inevitable nuclear catastrophe! We must act now!**
